Technical Data Sheet

ANTIfoam AF-7

Process Antifoam

Product Description

AF-7 is an outstanding antifoam that is exceptionally effective in photoresist developing and stripping applications. AF-7 is a nonionic surfactant that works at very low concentrations, is free rinsing and is compatible with all process equipment.

Physical Properties

Specific gravity:	0.94
pH:	6 - 8
Appearance:	clear, light amber liquid
Flash point:	> 200 °F

Operating Parameters

Use AF-7 "as is", no dilution is required prior to use. Use at a rate of 0.4 – 4.0 mls of AF-7 per gallon of working solution. AF-7 can be added manually or via a metering pump. Add AF-7 such that a stable foam height of 1-2 inches is maintained. As with any antifoam, AF-7 is intended to control excess foam, not eliminate foam. Care should be taken not to exceed the recommended usage rate; overuse of any antifoam can have a negative impact on the process and equipment.

Storage

Store in original containers above 40 °F.

Safety

Avoid contact with eyes, skin and clothing. Wear chemical handler's gloves, goggles and protective clothing when handling. Read and understand Material Safety Data Sheet before using this product.

Notice
